Art Unit: 1731

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7-9 are rejected under 35 U.S.C. 103(a) as obvious over PARKER with or without HOUSTON et al or RULE, JR. or BIALKOWSKI.

PARKER teaches measuring paper formation, e.g. flocculation, macro forming units or unstable streaks, and teaches using multiplier detectors, column 4, lines 60-64, and multiple light sources, column 7, lines 3-6, of a paper slurry on the paper machine wherein the light is reflected from the moving paper web (column 6, lines 40-44) and converted to an image by photo detectors (column 8, lines 7-8). It would have been especially obvious to use reflected light to measure paper formation as such is taught by HOUSTON et al or RULE, JR. (column 3, line 47) or BIALKOWSKI. See HOUSTON et al (Fig. 7, (200) and (100)) or RULE, JR. (Column 2, line, 66) for plural light sources.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over PARKER as applied to claim 1 above, and further in view of RULE, Jr..

It would have been obvious to use a line scan camera as the camera of PARKER as such is taught by RULE, Jr., column 3, line 7).

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over PARKER with or without HOUSTON et al or BIALKOWSKI as applied to claim 1 above, and further in view of RULE, Jr..

It would have been obvious to use a line scan camera as the camera of PARKER as such is taught by RULE, Jr., column 3, line 7).

Claims 6 and 10-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over PARKER with or without HOUSTON et al or RULE, Jr. or BIALKOWSKI as applied to claim 1 above, and further in view of ADMITTED PRIOR ART.

The use of a line scan camera would have been obvious as such is conventional in the art as evidenced by the ADMITTED PRIOR ART (specification, page 14, lines 8-13). The use of a line scan camera would have been obvious as such is conventional in the art as evidenced by the ADMITTED PRIOR ART (specification, page 14, lines 8-13). It would have been obvious to run the paper web of PARKER at 4000 feet/min. as such is conventional in the ADMITTED PRIOR ART (specification, page 11, lines 4-6). It would have been obvious to use a black formation fabric as such a formation fabric is conventional in the art as evidenced by the ADMITTED PRIOR ART (paragraph bridging pages 9 and 10). It would have been obvious to form a paper web having a weight of less than about 16 lbs/2880 ft<sup>2</sup> as such is conventional in the tissue art, see specification, page 10, lines 9-21. Claim 23, see PARKER, Figure 5.
